

To whom it shall concern ,I am a Professional truck driver,and i do indeed depend on my weather and traffic alerts that are provided to me via my XM satellite radio.I don't always pick up local programing on AM-FM channels ahead of time in order to adjust my planning on my routes. With the options i have with my satellite radio,it helps me with the decisions that happen upon me during the course of my job.As well as speaking for myself,i'm sure that about every driver that is on the road delivering this country's everyday needs will feel the same way i do about it.It is a vital part of my everyday needs to help me do my job the best i can. Thank you,Steve Ladd
